The Monthly Newsletter of The Central Florida Metal Detecting Club

POST HURRICANE IRMA EDITION

OCTOBER 2017

From The President's Desk By Alan James

We are now about midway through Florida's hurricane season and already we have had plenty of action. Hopefully all of you managed to weather the storms without too much damage.

Along with the hurricane season, many of us venture out to the beach looking for that special area of erosion. Have fun but be careful!

On Saturday, October 21, the Central Florida Metal Detecting Club will hold our annual club picnic. This will be held at the Methodist church pavilion on Highbanks Rd with a free hunt beginning at approx. 9:00 AM. The club will provide burgers & drinks. Members are asked to bring side dishes or deserts to share. This is one event you don't want to miss! Guests are welcome to join in the fun.

Since it is the October meeting, it is now time to start looking for volunteers to step up and throw your hat in the ring to be an officer of the club next year. It really is time for some new blood at the leadership table. I believe that each member of the board would be happy to step aside and make room for a willing group of club volunteers.

As you know, volunteers "sometimes" get volunteered because they aren't at the meeting to voice any input....for your information.... The next club meeting falls on Friday, 13th. Just sayin'.

As always, please keep club members and their families that might be having challenges in your thoughts and prayers.

I'll see you at the next meeting.

Alan

RANDOM SILVER FACTS

The primary source of silver today is the New World. Mexico is the leading producer, followed by Peru. The United States, Canada, Russia, and Australia also produce silver. Around two-thirds of the silver obtained today is a by-product of copper, lead, and zinc mining.
